

Python

Duration: 3 months

1. Introduction & Installation

- ⇒ History of Python
- ⇒ Python Features
- ⇒ Environment
- ⇒ Local Environment Setup
- ⇒ Getting Python
- ⇒ Installing Python
- ⇒ Setting up PATH
- ⇒ Setting path at Unix/Linux
- ⇒ Setting path at Windows
- ⇒ Python Environment Variables
- ⇒ Running Python

2. Python Syntax

- ⇒ First Python Program
- ⇒ Python Identifiers
- ⇒ Python Keywords
- ⇒ Lines and Indentation
- ⇒ Multi-Line Statements
- ⇒ Quotation in Python
- ⇒ Comments in Python
- ⇒ Using Blank Lines
- ⇒ Waiting for the User
- ⇒ Multiple Statements on a Single Line
- ⇒ Multiple Statement Groups as Suites
- ⇒ Command Line Arguments
- ⇒ Accessing Command-Line Arguments

⇒ Parsing Command-Line Arguments

3. Variables & Data Types

⇒ Assigning Values to Variables

⇒ Multiple Assignment

⇒ Standard Data Types

⇒ Python Numbers

⇒ Python Strings

⇒ Python Lists

⇒ Python Tuples

⇒ Python Dictionary

⇒ Data Type Conversion

4. Operators

⇒ Types of Operators

⇒ Python Arithmetic Operators

⇒ Python Comparison Operators

⇒ Python Assignment Operators

⇒ Python Bitwise Operators

⇒ Python Logical Operators

⇒ Python Membership Operators

⇒ Python Identity Operators

⇒ Python Operators Precedence

5. Conditional Statements

⇒ If Statement

⇒ The elseif Statement

⇒ Single Statement Suites

⇒ Loops

⇒ While Loop

- ⇒ The Infinite Loop
- ⇒ Using else Statement with Loops
- ⇒ Single Statement Suites
- ⇒ For Loop
- ⇒ Iterating by Sequence Index
- ⇒ Using else Statement with Loops
- ⇒ Nested Loops.
- ⇒ Loop Control Statements
- ⇒ Break Statement
- ⇒ Continue Statement
- ⇒ Pass Statement

6. Working With Numbers & Strings

- ⇒ Number Type Conversion
- ⇒ Random Number Functions
- ⇒ Trigonometric Functions
- ⇒ Mathematical Constants
- ⇒ Accessing Values in Strings
- ⇒ Updating Strings
- ⇒ Escape Characters
- ⇒ String Special Operators
- ⇒ String Formatting Operator
- ⇒ Triple Quotes
- ⇒ Unicode String
- ⇒ Built-in String Methods

7. Collections API

- ⇒ *LISTS

⇒ Python Lists

⇒ Accessing Values in Lists

⇒ Updating Lists

⇒ Deleting List Elements

⇒ Basic List Operations

⇒ Indexing, Slicing, and Matrixes

⇒ Built-in List Functions

⇒ *TUPLES

⇒ Accessing Values in Tuples

⇒ Updating Tuples

⇒ Deleting Tuple Elements

⇒ Basic Tuples Operations

⇒ Indexing, Slicing, and Matrixes

⇒ No Enclosing Delimiters

⇒ Built-in Tuple Functions

⇒ DICTIONARY

⇒ Accessing Values in Dictionary

⇒ Updating Dictionary

⇒ Delete Dictionary Elements

⇒ Properties of Dictionary Keys

⇒ Built-in Dictionary Functions and Methods

8. Date and Time

⇒ What is Tick?

⇒ What is TimeTuple?

⇒ Getting Current Time

⇒ Getting Formatted Time

⇒ Getting Calendar for a Month

⇒ The time Module

⇒ The calendar Module

⇒ Other Modules and Functions

9. Function & Modules

⇒ Defining a Function

⇒ Calling a Function

⇒ Passing by Reference Versus Passing by Value

⇒ Function Arguments

⇒ Required Arguments

⇒ Keyword Arguments

⇒ Default Arguments

⇒ Variable Length Arguments

⇒ The Anonymous Functions

⇒ The return Statement

⇒ Scope of Variables

⇒ Global vs. Local variables

⇒ The import Statement

⇒ The from import Statement

⇒ The from import * Statement

⇒ Locating Modules

⇒ The PYTHONPATH Variable

⇒ Namespaces and Scoping

⇒ The dir() Function

⇒ The globals() and locals() Functions

⇒ The reload() Function

⇒ Packages in Python

10. Peer-to-Peer Communication

⇒ FILES I/O

⇒ Printing to the Screen

⇒ Reading Keyboard Input

⇒ The raw_input Function

⇒ The input Function

⇒ Opening and Closing Files

⇒ The open Function

⇒ The file Object Attributes

⇒ The close() Method

⇒ Reading and Writing Files

⇒ The write() Method

⇒ The read() Method

⇒ File Positions

⇒ Renaming and Deleting Files

⇒ The rename() Method

⇒ The remove() Method

⇒ Directories in Python

⇒ The mkdir() Method

⇒ The chdir() Method

⇒ The getcwd() Method

⇒ The rmdir() Method

⇒ File and Directory Related Methods

11. Exception Handling

⇒ Introduction of Exception?

⇒ Handling an Exception

- ⇒ The except Clause with No Exceptions
- ⇒ The except Clause with Multiple Exception
- ⇒ The try-finally Clause
- ⇒ Argument of an Exception
- ⇒ Raising an Exception
- ⇒ User-Defined Exceptions

12. OOPS Concepts in python

- ⇒ Overview of OOPs Terminology
- ⇒ Creating Classes
- ⇒ Creating Instance Objects
- ⇒ Accessing Attributes
- ⇒ Built-In Class Attributes
- ⇒ Destroying Objects (Garbage Collection)
- ⇒ Class Inheritance
- ⇒ Overriding Methods
- ⇒ Base Overloading Methods
- ⇒ Overloading Operators
- ⇒ Data Hiding

13. Regular Expression

- ⇒ The match Function
- ⇒ The search Function
- ⇒ Matching Versus Searching
- ⇒ Search and Replace
- ⇒ Regular-Expression Modifiers: Option Flags
- ⇒ Regular-Expression Patterns
- ⇒ Regular-Expression Examples

⇒ Grouping with Parentheses

ADVANCE PYTHON

14. CGI PROGRAMMING

⇒ CGI PROGRAMMING

⇒ CGI Introduction?

⇒ Web Browsing

⇒ CGI Architecture

⇒ Web Server Support and Configuration

⇒ First CGI Program

⇒ HTTP Header

⇒ CGI Environment Variables

⇒ GET and POST Methods

⇒ Passing Information using GET method

⇒ Simple URL Example : Get Method

⇒ Simple FORM Example: GET Method

⇒ Passing Information Using POST Method

⇒ Passing Checkbox Data to CGI Program

⇒ Passing Radio Button Data to CGI Program

⇒ Passing Text Area Data to CGI Program

⇒ Passing Drop Down Box Data to CGI Program

⇒ Using Cookies in CGI

⇒ How It Works?

⇒ Setting up Cookies

⇒ Retrieving Cookies

⇒ File Upload Example

⇒ How To Raise a "File Download" Dialog Box?

15. Database Connectivity

⇒ What is MySQLdb?

⇒ Install MySQLdb?

⇒ Database Connection

⇒ Creating Database Table

⇒ INSERT Operation

⇒ READ Operation

⇒ Update Operation

⇒ DELETE Operation

⇒ Performing Transactions

⇒ COMMIT Operation

⇒ ROLLBACK Operation

⇒ Disconnecting Database

⇒ Handling Errors

16. Socket Programming and Email API

⇒ What is Sockets?

⇒ The socket Module

⇒ Server Socket Methods

⇒ Client Socket Methods

⇒ General Socket Methods

⇒ A Simple Server

⇒ A Simple Client

⇒ Python Internet modules

⇒ Further Readings

⇒ Sending an HTML e-mail using Python

⇒ Sending Attachments as an E-mail

17. Multithreading

⇒ Starting a New Thread

- 
- ⇒ The Threading Module
 - ⇒ Creating Thread Using Threading Module
 - ⇒ Synchronizing Threads
 - ⇒ Multithreaded Priority Queue
 - ⇒ XML PROCESSING
 - ⇒ What is XML?
 - ⇒ XML Parser Architectures and APIs
 - ⇒ Parsing XML with SAX APIs
 - ⇒ The make_parser Method
 - ⇒ The parse Method
 - ⇒ The parseString Method
 - ⇒ Parsing XML with DOM APIs
 - 18. GUI Programming
 - ⇒ Tkinter Programming
 - ⇒ Tkinter Widgets
 - ⇒ Geometry Management
 - ⇒ FURTHER EXTENSIONS
 - ⇒ Pre-Requisites for Writing Extensions
 - ⇒ First Look at a Python Extension
 - ⇒ The C Functions
 - ⇒ The Method Mapping Table
 - ⇒ The Initialization Function
 - ⇒ Building and Installing Extensions
 - ⇒ Importing Extensions
 - ⇒ Passing Function Parameters
 - ⇒ The PyArg_ParseTuple Function

⇒ Returning Values

⇒ The Py_BuildValue Function

19. Web Development Frameworks

⇒ Django

⇒ Flask

⇒ Pyramid

20. Project Work
